DETAILED ACTION

Allowable Subject Matter

Claims 1-9 are allowed.

The following is an examiner's statement of reasons for allowance: The prior art of record fails to teach to anticipate the claimed limitation of a cam mechanism comprising: a cam ring; wherein at least one of said two cam grooves of one said cam groove group intersects with another of said two cam grooves of another said cam groove group, said another said cam groove adjacent to said at least one said cam groove in said circumferential direction; wherein said plurality of cam follower groups are located at different positions in a circumferential direction of said linearly movable frame, and wherein in each said cam groove group, at least one of said at least two complementing cam followers of each said cam follower group remains engaged in a corresponding one of said at least two cam grooves when another cam follower of said at least two complementing cam followers passes through an intersection area of said intersecting cam grooves during a rotation of said cam ring. This limitation taken in conjunction with the other limitations of the claim makes the claimed invention allowable over the prior art of record. Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."

Art Unit: 2851

Conclusion

The prior art made of record and not relied upon is considered pertinent to applicant's disclosure. Sasaki (US 6490099 B2) shows the general state of the art.
